

# HANDMADE STONE VENEER

Proudly Canadian  
Made in British Columbia

**ROCKY MOUNTAIN**  
— STONEWORKS LTD —

# OUR STORY

---

Starting from modest beginnings, Robert McIntosh founded Rocky Mountain Stoneworks in 1999. **Robert aspired to provide Western Canada with the highest quality precast concrete products for residential, commercial and civil applications.** He built a great team, pulling together 100 plus years of cumulative industry knowledge, resulting in the creation and delivery of countless exceptionally crafted products.

With a passion for innovation, Rocky Mountain Stoneworks continues to develop and bring new products to market, such as Cloud Stone, Rocky Wall Retaining Wall, Concrete Fencing and the Anchorfast big block wall system.

Cloud Stone adds a lightweight environmentally friendly and LEED qualifying option to our stone veneer product offerings.

Rocky Wall retaining walls are manufactured using labour intensive wet-cast integrated staining techniques. This produces a unique, natural rock face that creates a stunningly beautiful retaining wall.

Anchorfast is a patent pending, revolutionary large block modular retaining wall system that does not require the use of geogrid.

**Rocky Mountain Stoneworks is proudly located in Aldergrove, British Columbia and online at [www.rockymsw.com](http://www.rockymsw.com).**

ROCKY  
MOUNTAIN  
STONEWORKS LTD

Capture the timeless appeal of natural stone at a fraction of the cost.

Rocky Mountain Stoneworks produces natural stone replicas cast from meticulously handmade molds. By using a precise blend of cement, lightweight natural aggregates and iron oxide pigments, the exact colour, texture and appearance of natural stone is achieved.

## Guarantee

RMS Cloud Stone products are covered by a 25 year limited warranty.  
RMS Traditional Stone Veneer is covered by a 50 year limited warranty.

# TABLE OF CONTENTS
